DETAILED ACTION

1. This communication is in response to Applicant's request for continued examination filed on August 28, 2008. Claims 1-5, 7-11, 13-20, 22 and 30 are pending in this application.

Allowable Subject Matter

2. The following is a statement of reasons for the indication of allowable subject matter:

3. The prior art of record (Woolston et al. US Patent 6,202,051) teaches facilitating Internet commerce through Internet worked auctions. Woolston discloses a method and a tangible machine-readable medium storing a set of instructions, for facilitating an electronic transaction comprising presenting via a computer system an auction purchase process.

Even though, the prior art of record teaches the above-mentioned features, the prior art of record fails to teach a computer implemented method and a tangible machine readable medium storing a set of instructions that, when executed by a machine, cause the machine to facilitate an electronic transaction, the computer implemented method including the steps of presenting, via a first computer system, both an auction purchase process and a fixed-price purchase process for purchase of an offering to a buyer, and responsive to receipt of a bid from the buyer as part of the auction purchase process, removing the presentation of the fixed-price purchase process.

For these reasons claims 1 and 30 are deemed to be allowable over the prior art of record and claims 2-5 and 7-9 are allowed by dependency on an allowed claim.

The prior art of record (Woolston et al. US Patent 6,202,051) teaches facilitating Internet commerce through Internet worked auctions. Woolston discloses a method of facilitating an electronic transaction comprising presenting via a computer system an auction purchase process. However, Woolston teaches that once a participant indicates their wishes to auction a good "the

good is identified as waiting for an auction date and may not be purchased on the electronic market".

Even though, the prior art of record teaches the above-mentioned features, the prior art of record fails to teach a method of facilitating an electronic transaction including the steps of: if an affirmative indication to purchase the offering at the seller determined price is received from the buyer and no bids have been received, for the offering, the buyer, having given affirmative indication, is the successful buyer; if a first bid is received from the buyer then a buyer from which the highest bid is received is the successful buyer. This conditional statement of determining a successful bidder is in step with the initial presentation of both a fixed price purchase process and an auction purchase process.

For these reasons claim 10 is deemed to be allowable over the prior art of record and claims 11 and 13-19 are allowed by dependency on an allowed claim.

The prior art of record (Woolston et al. US Patent 6,202,051) teaches facilitating Internet commerce through Internet worked auctions. Woolston discloses a method of facilitating an electronic transaction comprising presenting via a computer system an auction purchase process. However, Woolston teaches that once a participant indicates their wishes to auction a good "the good is identified as waiting for an auction date and may not be purchased on the electronic market".

Even though, the prior art of record teaches the above-mentioned features, the prior art of record fails to teach a method of facilitating an electronic transaction including the steps of: automatically displaying a list of offering information in the selected category, with a visual indicator appearing in association with a respective offering if a seller of the offering has given

affirmative indication to allow a buyer a chance to buy the first offering at a seller determined price; and removing the visual indicator after a first bid is received on the first offering from a first buyer.

For these reasons claim 20 is deemed to be allowable over the prior art of record and claim 22 is allowed by dependency on an allowed claim.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee, and to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled Comments on Statement of Reasons for allowance.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
